DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 3/30/2006, with respect to the rejection(s) of claim(s) 1-5 under 35 USC 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of 35 USC 112, 2nd paragraph.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 5, the language of the claim is unclear, and does not conform to the language of the specification. In particular, the phrases "route existing between an own router and a communications IP packet", "route said empty band related information and precedence of said communications IP packet in a route storing portion", and "and the largest empty band among the found route determining information" are unclear. Page 2 of the specification, second and third full paragraphs, lays out a clear version of the subject matter of these claims. It is recommended that applicant amend the claims using the language of the specification.

Regarding claim 3, the second paragraph of the claim is ungrammatical and unclear. The paragraph is supposed to describe the dummy packet, but does not appear to do so.

Claims 2 and 4 are rejected as being dependent on rejected base claims.

Claim Objections

3. Claim 4 is objected to because of the following informalities: in line 2, the phrase "has a composition of transmitting" should be changed to "transmits". Appropriate correction is required.
